ziply fiber

Edge Colo | **Everett Primary Center**

The Seattle metro area is home to a diverse mix of data centers and connected real estate, including major hyperscale campuses, cloud sites, edge computing centers and specialized secure facilities.

The Everett Primary Center puts your infrastructure on Ziply Fiber's backbone inside that ecosystem: carrier-grade space in a Ziply Fiber-owned facility, with direct access to the interconnections that make this market worth being in. That includes proximity to West Coast subsea cable landing infrastructure, which is accessible via Ziply Fiber's long-haul network reach without needing a dedicated connection to a specific landing point.

Facility Overview

Address	426 E Casino Rd, Everett WA 98208 – View map online
CLLI	EVRTWAXA
Building type	Ziply Fiber-owned central office
NOC location	Remote — Ziply Fiber NOC in Everett, WA; accessible 24/7

Space Options

Space type	Available
Standard locking cabinet	Yes
Custom cage	ICB
Custom private suite	ICB
Cabinet dimensions	24"W x 42"D x 84"H
Rooftop access for microwave/RF equipment	Yes - Tower on site

Custom private suites aren't available at this site. Cabinet and cage configurations handle most 1-to-10-cabinet deployments. If suite-level isolation is a hard requirement, ask your account rep about site options within the Ziply Fiber portfolio.

Power

AC UPS	Yes
DC rectifier plant	ICB
Generator backup	Yes
UPS redundancy	N+1 or greater
120V AC	20A, 30A
208V AC single phase	ICB
-48V DC	ICB
Utility feed	Single service entrance

Cooling

Cooling system type	IRC + CU
Cooling redundancy	N+1
Chiller redundancy	N+1

This site is part of a connected colocation portfolio that includes our owned edge colo sites and 70-plus connected data centers nationwide. **We're here to help you plan your connectivity and colocation strategy as your footprint grows.**

Building and Physical Infrastructure

The Everett Primary Center is built to carrier-grade standards in a Ziply Fiber-owned building. The construction meets seismic and flood requirements for the region, with early smoke detection systems that go beyond standard commercial code.

Smoke detection	Yes
BMS monitoring	Yes

Security

CCTV monitoring	Yes
Access control	Card reader for exterior gate and building; physical key for cabinets
Visitor policy	Escorted upon notice and/or request
Unescorted customer access	Authorized upon written notification
Access history	Retained in accordance to SOC 2 requirements

Compliance

SOC 2	Compliant
PCI	Compliant
HIPAA	Compliant

Network Connectivity

Most customers choose the Everett Primary Center because of where it puts them on the network, as well as where it sits on a map. The Seattle metro area is one of the Pacific Northwest's key interconnection points, and this site connects directly to Ziply Fiber's 400G-ready national backbone that runs the Northern Link Route from the West Coast through Minneapolis and Chicago to Ashburn. For organizations that need fast, reliable onward connectivity, that access is the asset.

On-net fiber	Direct adjacency to the Ziply Fiber national backbone
Backbone	400G-ready DWDM
Cross-connect options	Single-Mode Fiber (SMF)
Available speeds	Up to 100G Ethernet; Up to 400G WAVE
Carrier cross-connects	Available (customer provides third-party CFA/LOA)
Vault entrance configuration	Dual entrance
Route configuration	Multi-path

Support and Operations

NOC	Remote (Everett, WA) — 24/7 monitoring
Technical support	24/7/365
Repair/trouble resolution	6AM to 6PM, seven days a week (after-hours: CCSC 888-488-0072)
Smart Hands	Not available

Good Fit For

- Enterprises seeking carrier-grade colocation with direct access to high-capacity fiber infrastructure and the ability to grow connectivity
- Organizations deploying edge computing, AI inferencing, and latency-sensitive applications
- Cloud, SaaS, and managed service providers establishing regional points of presence
- Network service providers requiring strong regional connectivity
- Businesses expanding into new markets without investing in owned facilities
