

Edge Colo | Somerset West

The Hillsboro corridor is some of the most connected real estate on the West Coast. Major hyperscale campuses, dozens of carrier-neutral data centers, and dense metro fiber all converge within a few miles of this building.

Somerset West puts your infrastructure on ZiPLY Fiber's backbone inside that ecosystem: carrier-grade space in a ZiPLY Fiber-owned facility, with direct access to the interconnections that make this market worth being in. That includes proximity to West Coast subsea cable landing infrastructure, accessible via ZiPLY Fiber's presence across the Hillsboro data center cluster without needing a dedicated connection to a specific landing point.

Facility Overview

Address	3750 NW 185th Ave, Hillsboro, OR 97229 – View map online
CLLI	SMRWORXA
Building type	ZiPLY Fiber-owned central office
NOC location	Remote — ZiPLY Fiber NOC in Everett, WA; accessible 24/7

Space Options

Space type	Available
Standard locking cabinet	Yes
Custom cage	Yes
Custom private suite	No
Cabinet dimensions	24"W x 42"D x 84"H

Custom private suites aren't available at this site. Cabinet and cage configurations handle most 1-to-10-cabinet deployments. If suite-level isolation is a hard requirement, ask your account rep about site options within the ZiPLY Fiber portfolio.

Power

AC UPS	Yes
DC rectifier plant	Yes
Generator backup	Yes
UPS redundancy	N+1 or greater
120V AC	20A, 30A
208V AC single phase	20A, 30A
-48V DC	20A to 100A
Utility feed	Single service entrance

Cooling

Cooling redundancy	N+1 minimum across all major equipment
Chiller redundancy	N+1

This site is part of a connected colocation portfolio that includes our owned edge colo sites and 70-plus connected data centers nationwide. **We're here to help you plan your connectivity and colocation strategy as your footprint grows.**

Building and Physical Infrastructure

Somerset West is built to carrier-grade standards in a Ziplly Fiber-owned building — not a leased commercial shell or converted warehouse. The construction meets seismic and flood requirements for the region, with fire suppression and early smoke detection systems that go beyond standard commercial code.

Fire suppression	Multi-zoned, dry-pipe, double-interlock, pre-action system
Smoke detection	VESDA (Very Early Smoke Detection and Alarm)
Rooftop access for microwave diversity	Yes

Security

CCTV monitoring	Yes — all areas monitored and recorded
Access control	Badge access; all access points controlled
Visitor policy	Escorted upon notice and/or request
Unescorted customer access	Yes
Access history	Retained in accordance to SOC 2 requirements
Customer cage isolation	Customer equipment physically separated from Ziplly Fiber network equipment

Compliance

PCI	Compliant
HIPAA	Compliant

Network Connectivity

Most customers choose Somerset West because of where it puts them on the network, not just where it sits on a map. The Hillsboro metro area is one of the densest interconnection points on the West Coast. It connects directly to Ziplly Fiber's 400G-ready national backbone that runs the Northern Link Route from the West Coast through Minneapolis and Chicago to Ashburn. For organizations that need fast, reliable onward connectivity, that access is the asset.

On-net fiber	Direct adjacency to the Ziplly Fiber national backbone
Backbone	400G-ready DWDM
Cross-connect options	Single-Mode Fiber (SMF)
Available speeds	Up to 400G
Carrier cross-connects	Available (customer provides third-party CFA/LOA)

Support and Operations

NOC	Remote (Everett, WA) — 24/7 monitoring
Technical support	24/7/365
Repair/trouble resolution	6AM to 6PM, seven days a week (after-hours: CCSC 888-488-0072)
Smart Hands	Not available

Good Fit For

- Enterprises and neo-cloud operators needing right-sized space in a Tier 1 interconnection market
- Organizations requiring DR or redundancy with a Pacific Northwest second site
- Carrier and service providers needing a POP with strong onward connectivity
- Latency-sensitive workloads
